

SPL COMPILER SUBMISSION - TUTOR INSTRUCTIONS

=====

PROJECT TYPE: Type A - Complete compiler with executable BASIC code generation

SUBMISSION STATUS: COMPLETE

USAGE:

```
java -jar SPLInterface.jar <input_file.txt>
```

EXAMPLE:

```
java -jar SPLInterface.jar simple_program.txt
```

```
java -jar SPLInterface.jar lexical_error.txt
```

```
java -jar SPLInterface.jar syntax_error.txt
```

OUTPUT:

- Required submission messages for each compilation phase
- Generated BASIC code in *_output.txt files (for successful compilations)

EXPECTED MESSAGES

1. "Tokens accepted" (or "Lexical error: ...")
2. "Syntax accepted" (or "Syntax error: ...")
3. "Variable Naming and Function Naming accepted" (or "Naming error: ...")
4. "Types accepted" (or "Type error: ...")
5. BASIC code generation with output file creation

SYSTEM REQUIREMENTS:

- Java 23 or higher

BASIC code can be checked with [Online Free Basic Compiler](#)
