

SPL COMPILER SUBMISSION - TUTOR INSTRUCTIONS

=====

PROJECT TYPE: Type A - Complete compiler with executable BASIC code generation

SUBMISSION STATUS: COMPLETE

USAGE:

java SPLInterface <input_file.txt>

EXAMPLE:

java SPLInterface simple_program.txt

java SPLInterface lexical_error.txt

java SPLInterface syntax_error.txt

OUTPUT:

- Required submission messages for each compilation phase
- Generated BASIC code in *_output.txt files (for successful compilations)

EXPECTED MESSAGES

1. "Tokens accepted" (or "Lexical error: ...")
2. "Syntax accepted" (or "Syntax error: ...")
3. "Variable Naming and Function Naming accepted" (or "Naming error: ...")
4. "Types accepted" (or "Type error: ...")
5. BASIC code generation with output file creation

SYSTEM REQUIREMENTS:

- Java 23 or higher
- All .class files must be in same directory as SPLInterface.java

SUBMISSION READY: All required files included, no additional setup needed.

BASIC code can be checked with [Online Free Basic Compiler](#)
